SYSTEM KAN-therm Press GAS

The new system KAN-therm Press GAS is designed for interior gas installations with a multi-layer pipe PE-RT/Al/PE-RT and brass fittings with the diameter range 16-25mm.

1

The most modern system for interior gas installations.

High corrosion and chemical resistant.

6

2

Full safety of installation and operation.

Versatile assembly thanks to the possibility of utilizing U and TH profile crimping jaws.

7

3

Fast and reliable assembly thanks to Press technology.

System certified and fully compliant with applicable standards.

8

4

Full technical and design support.

5

KIWA Gastec approved certificate.

Ease of pipe laying thanks to a multilayer PE-RT/Al/PE-RT construction.
